

Cross Border with Microlight in Europe

Foreword

In almost all cases neither your Permit to Fly nor your Microlight pilot licence will be valid outside your own country. So in order to cross borders flying in a MLA you will need permission to enter and fly in a foreign country that requires such.

This document of the European Microlight Federation (EMF) will guide you in quite a lot of European countries to where to get the essential permission papers. However addresses and phone numbers can change, so please help us to keep it up-dated. This is the state of affairs at this moment in October 2005.

Be sure to send the most up-to-date copies of the following documents:

Pilot's Licence
Certificate of Registration
Certificate of Airworthiness (some countries prefer an English version)
Medical Certificate

Some countries require more documents like:

Insurance Certificate
Radio Certificate
Pilot's RT licence
Transponder

It is true that MLA pilots successfully come and go in many countries without the proper permissions. However, there is always a chance that, in the event of an incident/accident, the local law enforcement authority or/and your own insurance company may see things quite differently. So it is a false sense of security to think you can fly abroad without the proper Permission to Fly.

The information in this document is provided for guidance only and no liability is accepted for errors or omissions.

It is the mark of a good pilot to check the current regulations in force in the country of your destination.

So make sure your papers are all right.

You can help us by keeping this information update by mailing your information to rieteke@vluijt.nl Thank you very much.

Have a wonderful time flying in Europe and many happy landings!

European Microlight Federation. www.emf.aero

Comments:

Minimum of _ 2.900.000 third party insurance is required, passenger liability insurance 218.000 _, and an accident insurance 40.000 _.

For Microlight Pilots it is only allowed to fly in with a permission of Austrian Control.

For German Microlight Pilots there is an exemption valid till 31-12-05. Please have a look on <http://www.dulv.de/dulv/auslandfliegen/Oesterreicheinflug.htm>

MLA aircrafts need to have a transponder, a rescue system and an ELT device.

Comments:

Aircraft must have VHF radio and, in some areas, NDB or VOR equipment.

VFR flights: from 300 m (1500 ft) above highest obstacle up to 6100 m (FL 200), clear of clouds and in sight of surface.

Pilots shall carry pilot's license, aircraft registration certificate, aircraft airworthiness certificate and third party liability insurance policy.

Pilots and crew must be in possession of valid passports and visas. Citizens of EU, USA, Canada, Switzerland, Romania, Turkey, Israel and the countries of former Yugoslavia do not need a visa for a stay of less than two months.

Comments:

Microlights from a "Schengen country", complying with the definition of Article 2 of the Order of 23rd September 1998, relating to Microlights, are allowed to fly in France. You just have to follow the General Aviation VFR rules.

For MLA registered in Shengen Area, you have to fill in a flight plan to cross the border. Coming from out Shengen Area like the UK, you have to add a custom clearance to enter and before leaving. Some airfields are not open to MLA. You have to check while preparing your journey. You can find informations on most of the French aviation fields on the website www.nav2000.com and in the Bottlang Airfield Manual. Many airfields are private, with the permission of the owner you are allowed to land. Transponder required in class D airspace.

Beware of many restricted areas (like the Power plants) and military traffic.

General Microlight frequency: 123.50

Comments:

Microlights have the same responsibilities as all other aircrafts, however there are generally no landing fees for microlights. Radio required in all CTA and CTZ, transponder may be required in CTA and CTZ.

Switzerland

Permission required	no *

* Remarks

Pilots of microlight aircraft registered abroad may use Swiss airspace without the need for a special permit on the following conditions:

Technical requirements:

Valid certification in accordance with LTF-UL, BCAR-S, or possession of a recognised certification in accordance with JAR.

Regulations concerning pilots:

- Possession of the necessary pilot's licence for flying the type of microlight aircraft in the country of registration.
- Pilots who only hold a national licence (e.g. microlight licence) may only fly in Swiss airspace zones G and E.
Entry into Control Zone (CTR) for landing and takeoff purposes requires a prior permission (PPR) from the corresponding traffic control authorities (as a rule, possession of a valid on-board radiophone operator's licence is a prerequisite).
- Pilots who hold a recognised JAR or ICAO licence may fly microlight aircraft in Swiss airspace in accordance with the relevant Swiss provisions in the same way as normal registered aircraft.

Flight plans and customs formalities:

For cross-border flights, pilots are required to issue a flight plan and use an airport that handles customs formalities

Restriction of duration of use:

Swiss airspace may only be used on an occasional basis; the aircraft may not be kept permanently in Switzerland.

List of models approved for entry into Switzerland see
<http://www.ecolight.ch/NewFiles/Einflug.html>

For more information see

Comments: A home built aircraft's information need not be provided immediately but can be supplied by the owner to the CAA up to 30 days after the trip has been completed. Furthermore, permission need not be sought in advance. However, for a factory built microlight permission must be sought in advance and an exemption for 30 days must be obtained.
